EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin M. Carroll on 5/4/04.

The application has been amended as follows:

In claim 2, after the words "15 Angstroms", a period "." has been inserted at the end of the claim.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' method of purifying tertiary butyl alcohol is unobvious over the prior art of record. Although the closest prior art of record (Kahn et al. US Pat. 6417412) teaches a process for purifying tertiary butyl alcohol, which contains a minor amount of impurities, comprising contacting the tertiary butyl alcohol in the liquid phase with a large pore zeolite, such as zeolite X or zeolite Y, so as to reduce the impurity content, the prior art of record does not teach or suggest contacting the impure tertiary butyl alcohol in the liquid phase with a large pore zeolite and aluminum oxide to reduce the impurity content of the said impure tertiary butyl alcohol. Additionally, applicants have shown that when both the aluminum oxide and zeolite are used together as adsorbents for reducing the impurities in tertiary butyl alcohol, as presently claimed, a greater amount of impurities

are removed from the said tertiary butyl alcohol in comparison to using either an aluminum oxide or zeolite adsorbent alone (see the Examples and Tables on pages 5-8 of the present specification). All claims (1-14) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
